Re Item V:

Reference is made to the following documents:

D1: JP-A-4349926 (Patent Abstracts of Japan)

D2: JP-A-10028850 (Patent Abstracts of Japan)

D3: EP-A-1180391

D4: EP-A-1342500

D5: EP-A-1362630

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of independent claims 1,2 and 15 is not new in the sense of Article 33(2) PCT.

Documents D1-D5 disclose two layer metal Pd or Pd-alloy composite membranes consisting of a porous substrate and a Pd or Pd-alloy membrane where the Pd substantially exists on the outer surface of the porous substrate support with little or no presence in the pore channels of the substrate.

D1-D5 evenly disclose processes for the preparation of the membranes comprising the essential steps of preparing the porous substrate, treating the porous substrate with a pore filler, plating the support with a Pd solution and subjecting the membrane to a post-processing (see the relevant passages as indicated in the international search report).

D1-D5 (one or more of these documents) also disclose the features as claimed in dependent claims 3,5-11 and 16. The subject-matter of claims 3 and 5-11 is not new in the sense of Article 33(2) PCT.

Dependent claims 4,12-14 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of inventive step, the reasons being as follows:

No additional problem appears to have been solved by the additional technical features.

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 4,12-14 does not involve an inventive step in the sense of Article 33(3) PCT.
